

1 Users API Reference

1.1 Cheat Sheet

This is merely a quick reference of the available end-points. For further information please continue to the sections below.

Description	Method	Path (prefix: /backstage/api/1.0)
Fetch a list of the user's allowed Accounts. More info	GET	/users/current/allowed-accounts/

1.2 Reading

The API enables you to fetch either a list of Accounts.

1.2.1 Fetching User Allowed Accounts

To *fetch* a list of a user's allowed accounts, send an HTTP *GET* request in the following form:

```
GET /backstage/api/1.0/users/current/allowed-accounts/  
Host: https://backstage.taboola.com  
Authorization: Bearer [access-token]
```

This endpoint does not require permissions.

The response contains a list of [Account Base resources](#), which contain only a *subset* of the Account's fields.

1.2.1.1 Example Request

```
GET /backstage/api/1.0/users/current/allowed-accounts/  
Host: https://backstage.taboola.com  
Authorization: Bearer [access-token]
```

1.2.1.2 Example Response

200 OK

```
{
  "results":[
    {
      "id"       : "124",
      "name"     : "Taboola Demo - Publisher",
      "account_id" : "taboola-demo-publisher"
    },
    // ... more results
  ]
}
```
